Rich:

At this time, we have only been able to give these a very quick review and here's the comments/feedback identified:

[REDACTED]

At this time, please do not stop your progress on getting things ready

for your roll-out waiting for additional comments/feedback from us. If we happen to flag anything of critical concern, we'll let you know right away.

no, you didn't because we had already finalized them.. you entered in the middle that week's data process. You did review the data (of course) the resulted in the memos. The most critical memo for your review would be HW16. due to the barium (at the tap) exceeding the MCL but being below our established trigger.

Rich:

Janine is off today and to be honest, not sure that we had planned for reviewing and providing comments on the individual tox memos. Did we (HQ EU) review these for the 2nd week of sampling results ?

Subject: Week 3 Tox Memo Review

Tito,

Just so you are aware, we are awaiting any possible comments that Janine Dinan may have on Dawn Ioven's individual tox memos. We will need to know soon, so that we can put the packages together and make the calls this afternoon to set a time for delivery tomorrow. I know we just sent them yesterday, but if you could let us know by Noon today, that would keep us on schedule.

thanks.

Rich
